

ABSTRACT OF THE DISCLOSURE

A developer supply container detachably
mountable to an image forming apparatus, includes a
developer accommodating portion; a developer
discharging portion; and a cover cover in the
5 developer discharging portion, the cover being movable
between a first position in which the cover covers the
developer discharging portion and a second position in
which the developer discharging position is exposed,
wherein the second position is closer to the developer
10 accommodating portion than the first position.
